What is Scripta?

Scripta is a robust, web-based PDF manipulation tool. It enables you to carry out various operations on PDF files, including splitting, merging, converting, rearranging, adding images, rotating, compressing, and more.

50+ PDF Operations

Comprehensive toolkit covering all your PDF needs. From basic operations to advanced processing.

Workflow Automation

Chain multiple operations together and save them as reusable workflows. Perfect for recurring tasks.

Multi-Language Support

Available in over 30 languages with community-contributed translations. Accessible to users worldwide.

Privacy First

Self-hosted solution means your data stays on your infrastructure. You have full control over your documents.

Open Source

Transparent, community-driven development. Inspect the code, contribute features, and adapt as needed.

API Access

RESTful API for integration with external tools and scripts. Automate PDF operations programmatically.
